

Master of Science in Healthcare Management

Mission

The Mission of the Master of Science in Healthcare Management (MS in HCM) is consistent with the University's core mission to offer graduate adult students a career-focused education marked by individualized attention, civility, and respect for difference. The target audience for the MS in HCM program is students who are entering or advancing in the healthcare management field. The program meets where they are and supports and challenges them to become reflective and accomplished individuals committed to a lifetime of learning and contribution by a faculty who are committed to applied research and scholarly activities. Upon graduation, Master of Science in Healthcare Management students will be prepared to be reflective, competent, confident, and creative healthcare managers and leaders equipped to address opportunities and problems in quality management, patient safety, and project management facing their communities, the nation, and the world.

Vision

The Master of Science in Healthcare Management program will become a national leader in collaborative, interdisciplinary, and career-focused health care management education and will equip its graduates to visualize and achieve excellence in patient safety, quality improvement, and project management in a dynamic healthcare arena.

Values

The core values of Stevenson University and the Master of Science in Healthcare Management provide a foundation for faculty, staff, and students to fulfill the mission and achieve the vision of the institution. The values are focused on *community, learning, integrity, and excellence*.

Promoting a sense of community, the Master of Science in Healthcare Management program embraces the common bonds and obligations within and beyond the campus while respecting individual and cultural differences.

Fostering learning, the Master of Science in Healthcare Management program promotes the pursuit of life-long learning of theoretical and practical knowledge while encouraging a life well-lived – a lifelong philosophy of informed, critical thinking to meet evolving challenges and opportunities.

Instilling integrity, the Master of Science in Healthcare Management program requires acting with dignity and honesty while adhering consistently to the university and health care managements' ethical codes.

Achieving excellence, the Master of Science in Healthcare Management program lauds superior performance while recognizing the importance of persistence toward goals.
